

CM

Sunnex CM is an anti-vibration machine mount that have a stabilizing and damping effect on your installations with reduction of emitted noise.

Sunnex CM is designed without a retaining bolt to enable usage in narrow spaces. The depth and chamfer of the counterstrike is specially dimensioned to ensure that the external bolt or machines with built-in levelling bolts, is held in position.

This functional design enables a very low installation height and a long service life, which makes it cost effective and excellent for narrow spaces.

Features

- Loads up to 4000kg per machine mount
- Zinc plated or stainless steel
- Nitrile rubber

Applications

- Engineering machinery
- Warehouse equipment
- Computer equipment
- Scales

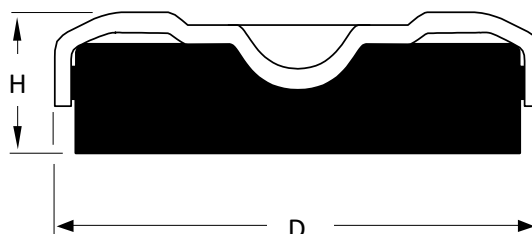

Benefits

- Excellent anti-vibration
- Great surface friction
- ideal for narrow spaces
- Free standing

Technical specification CM

Rubber:	Nitrile rubber
Finish:	Zinc plated or stainless steel
Load capacity:	50-4000kg
Diameter, D:	80-200mm
Height, H:	20-33mm

Model	Load per machine mount daN (kg)	D mm	H mm	Partno.	
				Zinc plated	Stainless
